Bruce Lii an Amiga game for AmiGameJam 2016 by AmigaWave.

We work hard for the game works with ingame music, simultaneous sound FX, big sprites, big screen area with scroll, multiple enemies, 32 colors, all only in one disk and work for Amigas with 68000 at 8 Mhz with only 1 Mb RAM. I know that game have some bugs but it's only a demo for the Jam. All material of this game are original, NO use public or private library stuff for graphics, sounds or music and not ripped any material.

AmigaWave is a team of Amiga fans with hi skills and knowledge in code, graphics, sound, music and all about Amiga.Amiga Wave actually have a youtube Channel with one Show every week about amiga things, hardware, reviews, test products, tutorials etc…

Credits:

Code by Roberto Mèrida
Graphics by Jojo073
Ingame Background graphic by Toni Gàlvez
Music by Fernando Cabrera & Roberto Mèrida
Support by Kikems

A game of AmigaWave team.

Resources used for make this game:

Coded in AmosProfessional from scratch. Have some routines to adapt some game resources if you use an Amiga 500 or Amiga 1200 like number of enemies, scroll step and screen size.

Pixel art with Deluxe Paint in 32 colors, not ripped or scanned images.

Music made with Protracker Amiga only with 3 channel to left one channel available for sound FX during game.We include two original sound tracks in MOD for this game.

Sound FX digitized with DSS8 Amiga sampler.

All material , graphics , musics code and sound fx was made from scratch on real Amiga Computers. Pixel art painted directly in deluxe paint by Jojo073 and Tony Gálvez without scan references and NO paint in photoshop and later reduce to amiga colors. You can check real live sessions from Jojo073 in AmigaWave Channel like this :
